

# Earth Day

22<sup>nd</sup> April 2021

## Begin at your home.

Pray and ask Holy Spirit to be with you on your walk. Pause and listen to God – what changes might God want you to make in your home to protect and preserve the planet.

Use this map to plan your own prayer walk!

### Listen

Can you hear any birds singing?

In **Matthew 6** Jesus talks about how God loves and provides for the tiniest birds. What does God want to say about his love for you today?

### Look for animals

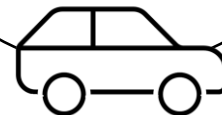

Pray for wildlife around the world, particularly those whose habitats are being destroyed.

### Look out for cars

Pray for pollution and climate change to be reduced.

Pray for all the scientists, politicians, inventors and individuals working to make a difference.

### Walk to a high place!

How far can you see?

Ask God for a vision for the future of our planet – what does it look like?

### Look for water

Pray for the oceans, lakes and rivers around the world spoiled by pollution and waste.

### Look for seeds

What could you do to plant seeds of change in your home, school and community, to protect and preserve the planet?

### Look for the tallest tree

Pray for the rainforests of the world and all those working to save them.

### Litter

Take a bag with you so that you can collect any litter you see. Make sure to do this carefully and safely.

Pray for God to change the hearts of those who litter, pray for the protection of local wildlife from the impacts of littering.
